

Physics Super League (PSL): **Where Science Meets Sport:**

The Department of Physics proudly hosted the Cricket Physics Super League (PSL) last week. This unique event brings together the dynamic worlds of cricket and physics, uniting students and faculty members in a spirited celebration of both athleticism and academic prowess.

The PSL isn't just a cricket tournament; it's a platform for participants to explore the fascinating intersection between physics principles and the beloved game of cricket. As teams face off on the pitch, they were also delving into the scientific nuances behind the perfect bowl, the impeccable catch, and the powerful stroke. Breaking down traditional barriers, the PSL encourages collaboration between students and faculty members, fostering a sense of camaraderie that extends beyond the classroom.

Some glimpses of events

Prize distribution ceremony

A ceremony to honor the winners and performers of the PSL event took place, and the esteemed Director graced the occasion as the chief guest. Additionally, the Head of the Department (HOD) and various faculty members were in attendance at this distinguished prize distribution ceremony.
