IRCBM's 4th Dental and Biomaterials Summer Camp (DBMSC 2018) was held successfully at the Interdisciplinary Research Centre in Biomedical Materials (IRCBM), COMSATS Institute of Information Technology, Lahore from July 31-03 Aug, 2018. It was a unique event of its kind as it brought together scientists, clinicians (dentists), students and faculty members from various Universities of Pakistan under the same roof to share their experiences and learn from each other's skills under the supervision of IRCBM's qualified resource persons. This was attended by 33 participants from different clinical and scientific backgrounds. This includes students, PG trainees and early career professionals from Army Medical College, DE Montmorency Dental College Lahore, Sharif Medical & Dental College Lahore, DOW University Karachi and Peshawar Dental College, Peshawar).

Summer Camp activities were divided into 4 days. The participants were introduced first to the importance of empirical experimental design and then to the fascinating field of Biomedical Materials & Tissue Engineering. This was then followed by interactive sessions and case studies. Equipped with knowledge of Biomaterials & Tissue Engineering the participants were then exposed to hands on experimentation in the form of groups. Hands on exposure to characterization techniques was the next step prior to an invigorating experimental design competition.

Director CIIT Lahore Pro Dr. Qaisar Abbas honored the certificates distribution ceremony on final day of the camp. On its closing Head IRCBM thanked the participants for their confidence, exemplary discipline and great deal of interest in dental and biomaterials summer camp.
