In Settings Click on
Change adapter options
Network Connection
Window will be opened

Find a setting

The screenshot shows the Windows Network Connections window. The address bar indicates the path: Control Panel > All Control Panel Items > Network Connections. The window title is "Network Connections". The toolbar includes options like "Organize", "Start this connection", "Rename this connection", "Delete this connection", and "Change settings of this connection". There are four network connections listed: Ethernet (WI-FI-DAAD, Realtek PCIe GBE Family C...), Ethernet 2 (Network cable unplugged, TAP-Windows Adapter V9), Wi-Fi (Disabled, Qualcomm Atheros AR948...), and VPN Lahore (Disconnected, WAN Miniport (PPTP)). The VPN Lahore connection is highlighted with a blue selection bar and a red rectangular box. A red arrow originates from the bottom of this box and points to the right, towards the instruction text.

Select VPN Lahore Connection
Right click on it and open
Properties

VPN Lahore Properties

General Options **Security** Networking Sharing

Host name or IP address of destination (such as microsoft.com or 157.54.0.1 or 3fe:1234::1111):

edge.cuilahore.edu.pk

First connect

Windows can first connect to a public network, such as the Internet, before trying to establish this virtual connection.

Dial another connection first:

[Privacy statement](#)

OK Cancel

Click on Security Tab

In Data Encryption Select "Optional Encryption (Connect even no encryption)"

Then select Allow these Protocols and Select Microsoft CHAP Version 2 (MS-CHAP V2) after that click on OK
