News of the month

One day seminar on Changing Role of Library Information Professionals Using Innovative Cutting-Edge Technologies

With the collaboration of COMSATS Institute of Information Technology Islamabad, LIS Solution (Ltd) organized one-day seminar on "Changing Role of Library Information Professionals Using Innovative Cutting-EdgeTechnologies". The seminar was held on January 20, 2018 in CIIT Islamabad.

Dr. Muhammad Tariq, Library in charge CIIT Lahore was the invited speaker and discussed about new tools and technology in professional field. In this seminar Muhammad Ishtiaq Deputy Librarian and Ms. Fatima Usman Assistant Librarian CIIT Lahore were also participated.

Awareness Session for Library Professionals of CIIT Lahore

After attending one-day seminar entitled "Changing Role of Library Information Professionals Using Innovative Cutting Edge Technologies" held at CIIT Islamabad on January 20, 2018. From CIIT Lahore, Dr. Muhammad Tariq, Library Incharge, Muhammad Ishtiaq, Deputy Librarian and Ms. Fatima Usman, Assistant Librarian attend the seminar. On their return, and as per practice, CIIT Lahore has arranged two hours seminar on January 26, 2018. All staff of CIIT Lahore attended this seminar. Dr. Muhammad Tariq, Library Incharge, Muhammad Ishtiaq Deputy Librarian and Ms. Fatima Usman Assistant Librarian share their experience and views with the attendees. All library staff appreciated and discussed the latest cutting edge technologyg being used in Library field.

Orange Party

To keep going its tradition, CIIT Lahore library staff arranged seasonal "Orange Party" on January 26, 2018 at CIIT Lahore. All library staff attended this party of seasonal oranges. Dr. Qaisar Abbas, Director CIIT Lahore and Additional Registrar Dr. Rasheed Ahmed Khan also participated and grace the event.

Birthday Celebrations of Dr. Robina Farooq

CIIT Lahore Library staff celebrated birthday of Dr Robbina Farooq (Convener of Library Affairs Committe) . The celebration was held on January 31, 2018. All library staff members participated and everyone wished her a wonderful birthday. We wish her every day to be filled with lots of love, laughter, happiness. Very happy returns of the day Maam always stay blessed.

Visit to Kasur City & Ganda Singh Border

LIS organized a recreational activity as an end of the semester break get together. The whole staff along with the Incharge library Dr. Muhammad Tariq Najmi went to Kasur. The first stop was at Ganda Singh Board, the second one was the tomb of Bhullay Shah, and the third one was the fish party at Javaid Fish Wala. the whole trip was excellent and enjoyable. All felt refreshed and all set for the upcoming semester.

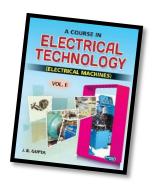

NEW Arrivals(Please click on covers forbibliographic detail)

Title: Plight of HEC in Pakistan

Source: The Nation

Dated: January 25, 2018, P.07

Plight of Higher Education in Pakistan

espite many tall claims, the higher education sector in 2017 could not even maintain its state that it achieved in the preceding years. The higher education confronted significant problems including meagrefunding, lack of academic freedom, the skimpy infrastructure and most importantly the undemocratic governing structure, which discourages teachers' empowerment. Instead of policy making to bring positive changes in overall higher education, the HEC remained ambushed with petty glitches. According to QS ranking, only 3 universities are listed in top 600 universities of the world as compared to what we had 2 years back when our 6 universities marked in top 800 universities of the world. HEC also failed to bring any change in the education system. Still, a number of universities are working with incomplete acts/or-dinances. The universities established during martial-law are still lacking senates and are being governed in an undemocratic fashion. Working without its 18 members governing board, the decisions are made in bureaucratic and ad-hoc fashions in the corridors of supreme academic body of the country. HEC has not published its progress report since 2014, the failures persist since the time current leadership assumed the charge.

Higher education budget was increased in financial year 2017-18. However, the budgetary allocation for education is still less than many south Asian countries. This year, most of the new development projects in the higher education sector have failed to get approval while universities remain devoid of critical infrastructures. Unlike the developed countries, the lack of involvement of the stakeholder specially the elected faculty has significantly marred the quality of higher education, rather shifted the focus to quantity only. The government is indulged in the rhetoric and the Higher Education Commission is involved in amplifying the government message of point scoring through establishment of new universities and laptop distribution schemes. Many universities are facing financia

pression is the most influential factor for emergence of academia as a driving force of the nation. Still freedom of expression is almost non-existent in many Pakistani universities. Repeated dictatorships and compromised democracies kept our society deprived of freedom of speech for long. Critical thinking and free speech is confronted by the leadership at universities and higher education. To arrange talks, one has to stride through many channels. Often, then discussions are circumscribed to boring and discouraging issues limiting the attendance of outsiders. It may not be expected from the university graduates to have critical thinking and presentation in such suffocating environment in the universities and institutes of higher education. Without provision of free speech, universities are merely a degree awarding factory rather than a repository of knowledge, and a seat for knowledge creation.

The most important factor affecting overall higher education environment is the governance model being executed at seats of higher learning. Huge irregularities have been obtained to the content of the con

Now it's time to think over the root cause of the existing problems in higher education, which primarily is the lack of democratic norms in varsities. Reinventing the wheel is not a visble solution, the system being executed at top universities of world may be studied and adopted after taking the stakeholders into confidence. Political leadership is not willing to surrender their undemocratic authority grabbed by dictators to the lower fevel. Participatory democracy ensures meaningful contributions to decision-making by all the stakeholders as well as transparency. The Higher Education governance model is based on dictatorial mindests, the democracy should be restored in higher education as per 1973 constitution. The acts of old and well-established universities like Karachi University are splendid and formed on the democratic norms. The act of each university should be revised according to the acts of these well-established universities with some university specific amendments. While formulating policies concerning higher education, the stake holders especially elected faculty should be taken on board. Existent closed door unilateral policies thould be revisited, the role and scope of all higher education bodies should be redefined. All the authorities should work within their prescribed limits and as per their mannance model is based on

The Higher Education governance model is based on dictatorial mindsets, the democracy should be restored in higher education as per 1973 constitution.

served during recent appointments of Vice-Chancellors (VCs) in the universities across Pakistan. Apparently, either the government is ignorant or deliberately appointing VCs who do not fulfill the criteria. The statutory bodies in the universities having democratic traditions are being sidelined by these VCs. The role of VC has become more of a subordinate to HEC or Chief Minister's Secretariat rather than an academic and administrative leader of the seat for higher learning. Moreover, some universities are functioning without proper statutory bodies such as Quaid-bazam University, International Islamic University, COMSATS etc., The extension and adhocism in the appointments of leadership at HEC and VCs have adversely affected progress of higher education in Pakistan.

Due to politically fixed term appointment, they are not the real stake holders but the teachers and students of the varsitles. The Vice-Chancellors are holding high powers, the faculty complains lack of motivation due to irregular appointments/promotions, waning academic freedom and poor resources for teaching and research. The ratio of contractual appointments at administrative positions is at rampant in HEC as well as universities. Critical and policy decisions are being made through these contractual employees who don't have any stakes at all, such contractual appointments are also violation of the verdicts of the Supreme Court of Pakistan.

date prescribed in constitution of Pakistan.

The ad hocism and extension culture is should be discouraged. Year 2018 is very important for higher education; the top leadership in higher education are going to complete their terms, including the chairman HEC and tens of vice-chancellors. It is high time to advertise all those positions and induct suitable persons on merit. The political appointments have already ruined higher education system in Pakistan. The HEC leadership as well as the Vice-Chancellors should present their progress to faculty and students each year. Such practice will bring transparency in the affairs of universities and is vital for the uplift of higher education. Prime Minister and President of Pakistan should take out some time to rescue the higher education; and at least appoint all higher education and at least appoint all higher education for the office of Higher Education Ombudsman may be an excellent step for maintaining the good governance in universities efficiently and effectively. The ombudsman office is essential for redressing the issues of teachers, students and other employees, which can save time and resources of stakeholders as well as making them accountable.

The writer is the elected President FAPUASA-Islamabad and works as an Assistant Professor of Computer Science at International Islamic University Islamabad, Pakistan,

Source: Daily Times

FAPUASA hails deferment of COMSATS bill full of 'lacunae'

Staff Report

Federation of All Pakistan Universities Academic Staff Association (FAPUASA) on Sunday appreciated parliamentarians for raising their voice, which had resulted in deferment of the bill suggesting upgradation of COMSATS Institute of Information Technology (CIIT) to university.

The bill, which was initially passed from Senate was tabled in the National Assembly on January 17, 2018 and was deferred owing to a proposed amendment by Abdul Qahar Khan Wadan, an MNA from Balochistan. Wadan objected to the lack of teachers' representation in decision-making forums of the proposed university. "The bill did not address the concerns of the faculty."

Parliamentarians had raised several issues, including the provision of job security of employees in the bill passed by Senate, as the bill did not mention tenure and credentials for appointment of top officials of the pro-

posed university.

statement, In FAPUASA Pakistan President Dr Kaleemullah and Islamabad Bareach President chapter Shehzad Ashraf Chaudhry said, "We are thankful to legislators for their efforts to postpone the bill based on approach. dictatorial Participatory democracy is the only way forward for the nation.

They went on to say:
"The recent decline of the higher education is due to the undemocratic policies being executed at seats of higher learning. Pakistan is still lacking the participatory democracy, where stakeholders exercise their share in decision-making.

In a parliamentary democratic system, power is vested in the people, who exercise their power through elected representatives in parliament, which is the most superior forum."

They reiterated the demand to restore democracy in all educational institutes of Pakistan as per the constitution.
